1) What is the DSM V?

2) How can you informally assess whether a behavior is normal or abnormal? (the 5 criteria listed on the board)

3) What were the 4 personality disorders discussed in class and their symptoms.

4) What is MPD/DID? How does MPD differ from schizophrenia?

5) What do 95% of all those diagnosed with MPD have in common?

6) What is a “nervous breakdown”?

7) What are the signs/symptoms of Panic Disorder?

8) Everyone has minor, irrational fears called phobias. Know the names and symptoms of the common phobias discussed in class.

9) What are obsessions? What are compulsions? What are some common elements of OCD?

10) How are Psychotic Disorders different from Neurotic Disorders?

11) What are some common symptoms found in psychotic disorders?

12) Know the signs/symptoms and onset of chronic schizophrenia.

Please remember that part of your final exam is cumulative. You may want to skim over the first three exam reviews.
